Professional Experience

Full Stack Developer — @Klixmant
July 2026 - Present

- Designed and integrated into the ERP a real-time plant efficiency monitoring module for 7 production processes and 15 operators.
- I gather requirements with Industrial Engineering and turn them into ERP rules.
- Built a WhatsApp chatbot connected to Effi ERP: ~500 sales a week.
- With the chatbot, sales loading and logistics are 60% more efficient.
- I lead an AI workflow: PRDs approved by management, OpenSpec specs and agents (Claude Code / OpenCode); requirement rework fell 50%.

Full Stack Developer — @Tiresia
May 2025 - November 2025

- Built DIAN e-invoicing platform modules with Angular and NestJS.
- Built complex reactive forms and the API layer with RxJS.
- Refactored backend services to improve response times in high-volume operations.
- Wrote unit and E2E tests and took part in technical and architecture decisions.

AI Developer & Implementer — @ClonAI
February 2025 - May 2025

- Met with client companies to understand their operations and adapt the chatbot platform to each one's needs, from diagnosis to launch.
- Designed LLM and agent workflows in n8n, integrated with WhatsApp and audio.
- Refactored legacy frontend code in Angular.
- Upgraded Angular regularly, keeping every dependency compatible with each new release of the framework.
- Took part in design and architecture meetings for the chatbot platform.

Full Stack Developer (.NET) — @Schein
October 2024 - February 2025

- Built and maintained a client's ERP (accounting, inventory, customers and suppliers) with Blazor, .NET and SQL Server.
- Optimized SQL and LINQ queries with Entity Framework to speed up statistical reports and data loading.
- Built the help desk module for internal support tickets.
- Refactored legacy code and cut deployment times.
- Built REST APIs with .NET and Entity Framework.

Digital Identity Manager & Web Developer — @M.S.S
November 2025 - June 2026

- Designed, built and deployed the Multisoluciones S.A.S website with React and TailwindCSS.

Skills

Programming Languages
C#, TypeScript, JavaScript, SQL, HTML, CSS/Sass.

Libraries & Frameworks
.NET 8, Angular, React, Next.js, NestJS, Node.js, Blazor, Prisma.

Tools & Platforms
Git, Docker, Linux (VPS), SQL Server, PostgreSQL, MySQL.

AI & Automation
n8n, LLMs, agents, MCP, Claude Code.

Education

UTS · Systems Engineering
In progress
Campuslands (2023 - 2024): 2,100-hour software development bootcamp.

Certifications

- Angular: De cero a experto — Udemy
- Nest: Backend escalable con Node — Udemy
- Responsive Web Design — freeCodeCamp
- Foundational C# — freeCodeCamp

Awards

- 1st place as a developer, Global Game Jam 2026
- Steelfall (Unity, C#), built with a team

Languages

- English (B2)
- Spanish (native)
